

Cataract Consultation Information

Did you know there are options for your cataract surgery?

We want to make sure you understand all your options and how lens technology will affect your vision after your cataract surgery so you can make the best choice for you. This information sheet outlines your lens and cataract surgery options. Your doctor will discuss this information with you during your cataract consultation. We look forward to seeing you!

Standard Package

Expect to wear glasses for all activities.

Most insurances will cover all or a portion of this procedure.

- Traditional cataract procedure
- Standard lens implant
- Does not correct near vision nor astigmatism

Astigmatism Package

Expect to wear reading glasses for near vision activities.

\$1995 per eye

- Cataract procedure with astigmatism correction
- Performed during traditional or laser cataract surgery
- Reduced and/or eliminated amount of astigmatism
- Improved distance vision

Advanced Technology Package with LenSx

Expect freedom from glasses for most activities.

\$2995 per eye

- Custom laser cataract procedure with the LenSx laser and an advanced technology lens
- A more gentle, precise, and accurate surgical procedure
- Reduced or eliminated amount of astigmatism
- Less swelling and a faster recovery over a traditional cataract procedure
- Improved near, intermediate, and distance vision

Light Adjustable Lens Package

Expect the ability to adjust your vision to your lifestyle after cataract surgery.

\$4500 per eye

- Custom laser cataract procedure with the LenSx laser and the LAL lens
- A more gentle, precise, and accurate surgical procedure
- Reduced or eliminated amount of astigmatism
- Less swelling and a faster recovery over a traditional cataract procedure
- Improved near, intermediate, and distance vision
- Test drive your vision after surgery and make adjustments to suit your preferences
